

Eurosatory 2018 starts today

- **The international ground and air-ground defence exhibition will show from June 11th to the 15th in Paris, the latest technologies and products among the world.**
- **The Spanish industry has its own pavilion coordinated by TEDAE.**

Paris, June 11th, 2018.

This morning Eurosatory 2018 opened its doors, more than 1500 companies from all around the world are attending. It is the most important *exhibition* about ground and air-ground defence and security and will predictably have more than 50,000 professional visitors from more than 140 countries.

The Spanish defence industry has its own pavilion, coordinated by TEDAE (The Spanish Technological, Defence, Aeronautic, Security and Space Association) which will show the latest technology from companies like **Escribano Mechanical and Engineering, Gaptex, Indra, Instalaza, Navantia, Sapa Placencia, Tecnobit, TSD International, Uro, Mades, Expal y GDELS Santa Bárbara Sistemas**. The Spanish pavilion shows the high technological level of our industry, and how its products and services have a solid implantation in international markets.

The Spanish Ambassador in France, Fernando Carderera, accompanied by the Deputy Director General of International Relations of the Ministry of Defense, General Felipe de la Plaza; the Deputy Director General of Programme Management, General Salvador Álvarez, and the Abroad Support Office Manager, General Luis Manuel López, have attended Eurosatory to promote institutional support to the Spanish companies present. The Spanish pavilion exhibits a wide range of products and services, from dropdown and rapid implementation buildings, sheds and warehouses, drone inhibition and detection systems, high reliability advanced electronic and communication systems, weapon equipment, high performance transmitters or a wide range of armored tactic vehicles, all terrain and for ground vigilance.

Defence companies integrated in TEDAE export 81% of its billing, in 89 countries, making it 7th place in global ranking. They reinvest 11% of their business volume in I+D, key to their success, knowing their technological leadership is its most competitive feature. Our industrial network is one of the few that completes the product cycle; development, fabrication, integration and maintenance. The Spanish industry has excellent products and technological competitive niches in all areas: ground, navy, air and space.

+ acerca de TEDAE
